### Holland Mesh Fence

Security Euro Fence, also called Holland fence. It is one kind of High welded wire mesh with curves. It is very beautiful and economy. It can be used as security fence adapt to the ups and downs of the hills with its convenient installation.

There are two main parts to form the euro fence. First part is the fence panel roll. The roll packing is different from other fence because of its wire thickness is thinner than other kind of welded fence. It's soft enough for rolling up. Second part is the swallow tail post system. The swallow tail post is a special type of post designed for Security euro fence, connecting the panel with "U" shape clips.
