358 Fence

YeZhen supplies both posts and 358 mesh panels in a galvanised and polyester powder-coated finish in any of a wide range of standard RAL colors, with non-standard colour available to order.

Compared with high-security palisade, high-security mesh panel fencing is similarly difficult to scale, harder to cut and makes it impossible to pass through all but very small objects. Mesh panel fencing can also be considerably higher (6 m rather than 4 m for palisade).

The Characteristic of Hot-dip Galvanized 358 Fence Netting:

Good corrosion resistance, anti-aging, easy and quick installation, anti-climbing, anti-cut, beautiful appearance, Smooth surface, excellent visibility, Low maintenance costs.

1. Type

142041- Hot-dip Galvanized

142042- Galvanizing + Powder coated

2. Specification

a. Standard mesh panel- 2D

Image	Mesh size	Height (mm)	Width (mm)	Wire diameter	Post Height	No. Of brackets
	76.2x12.7mm 75x12.5mm 75x13mm	2100	2515/2750/3000	2.0-4.0mm	2700	7
		2200	2515/2750/3000		2800	8
		2400	2515/2750/3000		3000	9
		2700	2200/2300		3700	10
		3000	2200/2300		4000	11
