### Perforated steel sheets

Perforated sheets are well suited for sorting, facades, ceilings, lamps, shelves, shielding, steps and of course many other purposes as well. Perforated steel sheets are available in several basic forms. They are sheet/panel/plate, screen, coil, and tube.

Here is details for your correct chosen the suitable Perforated Steel Sheet:

Hole Type	Round, Square, Hexagon, Decorative hole, etc.
Material	Mild Carbon Steel, Galvanized Steel, Aluminum, Stainless Steel, Brass Sheet, Plastic Sheet etc.
Width	0.3m-1.22m
Length	0.8m-2.44m
Perforated area percent	7%-83%
Perforation mode	Straight, 45°, 60° staggered pattern.
Reprocessing	Bending, rolling, welding, cutting, folding or specified by customers
Surface Finish	Mill, galvanized, powder coated, painted

### **Perforated Safety Grating**

Material: Hot rolled steel plate, pre-galvanized steel plate, carbon steel plate, aluminum alloy plate (5052), stainless steel plate 304 or 316

Advantages:

- **Lightweight:** The lightweight diamond design and construction make it easy to transport and install the product wherever you need it.
- **Easy to fabricate:** You can easily fabricate diamond grating products to your specifications — custom fabrication is a breeze.
- **Slip-resistant walking surfaces:** Eliminate worries about visitors slipping and falling, and possibly suffering a serious injury.
- **Maintenance-free:** The remarkable durability of safety grating eliminates the need for preventive maintenance and ensures a low cost of ownership and excellent return on your investment.

### Specification:

Material	Raw material thickness	Channel height	Channel Width	Length
Low carbon Steel	2.0-6.0mm	20-80mm	120-1000mm	≤6m
Aluminum	3.0-6.0mm	20-80mm	120-1000mm	≤6m
Galvanized steel	2.0-6.0mm	20-80mm	120-1000mm	≤6m
Stainless Steel	2.0-6.0mm	20-80mm	120-1000mm	≤6m
Remark: Above data for your reference, and exact specifications can be customized.
